

life cycle	a series of changes in the life of a living thing , including reproduction
reproduction	the production of offspring by a living thing
interconnection	a connection between two or more things
mammal	a warm-blooded vertebrate that has live young and hair or fur
amphibian	a cold-blooded vertebrate that begins life underwater and develops the ability to breathe and live on land
metamorphosis	the process of transformation to adult form where a creature completely changes
hibernate	when a creature spends winter in a very deep sleep where they rest in a safe, often dark place, to survive the cold
incubate	when a creature sits on eggs to protect them and keep them warm before they hatch
larva (larvae)	very young insects or amphibians , before they transform into adults, e.g., caterpillar

most large plants reproduce by combining a male and female gamete (pollen and ovule) to make a fertilised egg that grows into an embryo, the embryo or baby plant is protected inside a seed

Sir David Attenborough
a broadcaster and natural historian

Dame Jane Goodall
a primatologist and world expert on chimpanzees
